

*Sunna Alpakas* – Breeding and manufacturing of natural fibre bedding

Our Service for Breeders: We can produce for your farm shop with the wool of your animals.

Sunna Alpacas is a breeding farm and bedding factory. We offer breeding services, animals for sale and handmade bedding and clothing products.

If you are a breeder, we can turn your wool into beautiful organic products. We offer a full service including cleaning, washing, drying, carding and tailoring.

Sunna duvet inners are filled with the best Alpaca fibre. Alpaca fibre adjusts to body temperature, does not retain moisture, does not smell and is antibacterial. We work with only the best quality fleece. It is cleaned by hand without chemicals. The cotton cover for the duvets and pillows is certified organic cotton made in Germany. The combination of the organic cotton outer layer and organic Alpaca fleece inner gives a unique natural sleeping environment.

This business all started when we visited Peru and came across Alpacas on a tour. I fell in love with the animals and wanted to have my own. I am a trained master craftsperson and in the beginning I just wanted to follow my passion to work with wool from my own animals to make products for myself and my family. This went so well that I started to offer this service to other breeders. Over time this grew into a fully fledged business in my own manufacturing building north of Berlin.

Discuss with us what you would like to achieve and we will make it happen.  
Anything is possible.

*Ingeborg Papenbrock*
